Career Summary :

Motivated and detail-oriented Computer Science graduate with good proficiency in Java, web development, and full-stack application design. Passionate about solving real-world problems through clean and efficient code. Seeking a challenging role as a Software Developer where I can apply my technical knowledge and contribute to innovative solutions.

Technical Expertise:

Languages	: Java (Proficient), Python, SQL, PHP
Web Technologies	: HTML, CSS, JavaScript, React, Node.js, Spring boot
Tools & Platforms	: Git, Docker, AWS, Render, MySQL, Postman, Maven
Data Science & AI	: Pandas, NumPy, Cohere API
Core CS Concepts	: DSA, OOP, REST APIs

Employment Summary:

Software Development Intern – Prodigy

Duration: [Oct 2024 – Dec 2024]

- Worked on full-stack development of web applications using Java, HTML, CSS, and AWS in an Agile environment.
- Responsible for writing efficient code, fixing bugs, and optimizing performance.
- Collaborated with team members to improve UI/UX and deployment strategies.

Project Details:

1. AI Wrapper Tool

- Developed a web-based AI chatbot using Flask and the Cohere API to enable real-time interaction with a large language model.
- Created a clean, responsive front-end with HTML, CSS, and JavaScript to enhance user experience.
- Implemented Docker for environment management and deployed the app on Render.

2. Weather App

- Designed and built a weather application using HTML, CSS, and JavaScript.
- Integrated OpenWeatherMap API to fetch real-time weather conditions and 5-day forecasts.
- Deployed the app using AWS S3 and CloudFront for global accessibility.

3. Pet Agency Management System (Java)

- Developed a console-based application using Java to manage pet listings, adoption processes, and customer records.
- Applied OOP concepts to structure the code into classes like Pet, Customer, and Agency.
- Included file-based data storage for record keeping without a database.

4. Background Noise Suppression Using Deep Learning

- Created a noise suppression system using spectral subtraction, Wiener filtering, and spectral gating.
- Implemented spectrogram-based analysis to reduce breath and Gaussian noise.
- Enhanced speech clarity in real-time environments using adaptive noise filtering.

5. Course Management REST API (Spring Boot)

- Built a RESTful web service using Spring Boot to manage course records with CRUD operations.
- Integrated MySQL database using Spring Data JPA and Jpa Repository for data persistence.
- Applied layered architecture (Controller, Service, DAO), configured Maven and application properties, and tested APIs using Postman.

Academic Qualification:

Bachelor's Degree – B.Tech in Information Science
M S Ramaiah University of Applied Sciences, Bengaluru
2025 - Expected

PCME
Mount Carmel PU College, Bengalur
